

DIONSON, JERALD R.

Software Developer

0938-229-8177 | dionsonjeraldranoco@gmail.com | Camarin, Caloocan City

<https://opjerald.github.io>

Software developer with 3 years of experience in building applications, solving technical problems, and delivering efficient solutions through clean and maintainable code.

Work experience

Software Developer

Katana Techworks Inc. | Feb 2023 - Present

- Designed, developed, and maintained multiple applications, delivering new features, improving existing systems, and building full applications from the ground up.
 - Utilized diverse technologies including PHP, C#, Python, and JavaScript, while integrating AWS cloud services to support scalable and reliable solutions.
 - Collaborated with cross-functional teams and worked directly with clients to gather requirements, resolve technical issues, and ensure successful project delivery.
-

Projects

Web portfolio

- Built and deployed a personal portfolio website using vanilla HTML, JavaScript, and Less CSS, showcasing projects and technical skills, and hosted it on GitHub Pages for public accessibility.

Popcornhub

- A movie torrent platform powered by the YTS API, enabling users to download movies in multiple resolutions; built with Next.js using server actions and deployed on Vercel for scalable access.

Just Dictionary

- A web-based dictionary powered by Dictionary API, built with Tanstack Start and deployed on Vercel, allowing users to quickly search and access word meanings.
-

Trainings

Full Stack Web Development Training

Village 88 | July - October 2022

- Completed intensive full-stack development training covering HTML, CSS, JavaScript (ES5/ES6), PHP, MySQL, Bootstrap, LESS, Git, and Responsive Web Design, building multiple mini-projects and designing databases using MySQL Workbench.
- Developed web applications using PHP, AJAX, and ORM with CodeIgniter 3, applying Object-Oriented Programming (OOP) and the MVC architecture to solve real-world programming problems.
- Built real-time web applications using Socket.io and successfully passed the Advanced JavaScript certification track.

- Completed a Back-End specialization using Ruby on Rails, applying Test-Driven Development (TDD) with RSpec, Factory Bot, and Capybara.
 - Awarded Certificate of Participation for active engagement throughout the training program.
-

Awards

- **Proficient in Back-End Developer (Village 88)** - Passed the exam by building a Friendster-style web application using Ruby on Rails, SQLite, RSpec, Factory Bot, and Capybara within an 8-hour time limit.
 - **Proficient in Advanced PHP (Village 88)** - Successfully replicated a provided wireframe and functional specifications using HTML, CSS, jQuery, AJAX, CodeIgniter 3, and MySQL within 8 hours.
 - **Proficient in Web Fundamentals (Village 88)** - Completed the exam by cloning a webpage using pure HTML and CSS within a 4-hour time limit.
-

Education

BS Computer Science, University of Caloocan City (S.Y. 2018-2022)

- Conducted a webinar entitled "Web Design 101: Getting Started in Front End Develop" in lower year level students.

TVL-ICT - Bestlink College of the Philippines (S.Y. 2016-2018)

- Best Programmer and with honors.
